

## Kimberly-Clark Product Technical Bulletin

**Brand Title:** KIMTECH\* Wipers for the WETTASK\* System

**Description:**

KIMTECH\* Wipers are designed for use in the refillable WETTASK\* wiping system. The system is composed of a dry, coreless, centerpull roll and a re-usable bucket. The end-user adds their own chemical solution to create a customised pre-saturated wiper for preparing, cleaning, disinfecting or sanitising surfaces.

This product uses a highly absorbent HYDROKNIT\* base sheet compatible with detergents and water or solvent based cleaners for general surface cleaning and degreasing.

**Product Lines:**

Code	Type	Color	Size	Count
06001	Roll	White	305mm x 318mm	60 wipers per roll 6 rolls per case + 1 bucket with lid

**Packaging:**

The dispenser bucket is made from High Density Polyethylene (HDPE) with a leak resistant cover, dispensing loop and carry handle.

**Wiper Properties:**

The following targets are current as of the date of this revision, subject to change at any time without prior notice.

Physical property data is as produced, subsequent storage conditions and the age of the product may affect the properties of the product as received.

	Nominal	Test Method
CD Wet Grab Tensile		
(lbf)	8.5	STM-5668
Wet Taber pulp side		
# of cycles	31	RTM-6353
Tab Tensile		
grams	5000	STM 5500

**Workmanship standard:**

Wipers are made in accordance with reasonable industry practice with respect to holes, tears, wrinkles, cleanliness and foreign materials or dirt. Edges are to be cleanly cut and not ragged. Wipers are folded as specified. Wipers have disagreeable odour, either wet or dry, in accordance with reasonable industry practice.

**Ingredients:**

These wipers are made from wood fibre and polypropylene using patented HYDROKNIT\* technology.
